

## Windows 98 Update

Microsoft's first update to Windows 98 will be posted to the MS website on August 18. The update is a service release, a bug-fix version, but it will be advertised as a multimedia upgrade.

The update will modify:

- Microsoft DirectX gaming technology.
- Microsoft Media Player, with access to Windows Media, Advanced Streaming Format, QuickTime, MIDI, RealAudio, and RealVideo content.
- New Web fonts.
- Microsoft Chat 2.5.
- WebTV Guide, which supports the GemStar electronic programming guide.

DGL has received complaints from clients who have upgraded to Windows 98 on their own. We urge you to carefully consider why you may want to upgrade your operating system. And, please don't upgrade to Win98 without first discussing the benefits and risks with us.

## Get Promoted

Did you know that we offer free website promotion to our website hosting clients? We'll submit your website URL to over 900 search engines for no charge.

The MD State Board of CPAs, this is a reporting

In Access, Level 2 you'll learn to

join multiple tables to create relational queries and reports.

Called normalizing the data, this is required knowledge for all users!

## Is Your Email Secure?

Eudora Pro, the most popular Internet email application puts users at a bit of a risk for attack by Java applets and JavaScript apps.

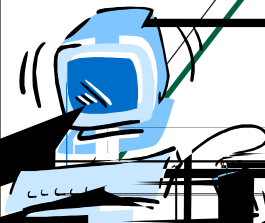

All of the major email applications have recently reported security holes, however, the maker of Eudora Pro has been creating patches to fix security holes in the applications. At the same time, a malicious imposter, pretending to work for Microsoft, has been distributing a fake patch.

If you're an Outlook email user, get the 1998 update, details posted at [dgl.com/dginfo/1998/dg980812.html](http://dgl.com/dginfo/1998/dg980812.html).

## Netscape Tip

Use the <Ctrl-B> keystroke to open a window of all your Netscape Navigator bookmarks. Using drag and drop, you can arrange your bookmarks to suit your taste.
